

## Purchasing Commodity Codes

**There are several categories of purchases:**

- 1) supplies - anything that will be 'used up' with no remaining salvage value;
- 2) equipment - anything with a life of more than one year that will have a salvage value,  
     Minor equipment is under \$200 & will be purchased with object code 4000 funds  
     Inventorible equipment is over \$200 & will be purchased with object code 6000 funds  
     Capital equipment is over \$5000, will be purchased with object code 6000 funds & will be depreciated.
- 3) services - no physical item is ordered, but rather a repair, consultant services, equipment warranty, non tangible

The purchase of supplies, services, & equipment under \$200 will have a three digit numeric Commodity Code. Equipment that has a cost of \$200 or more will have a three digit numeric plus an alpha code. If you are using a 4000 or 5000 object code you will need a three digit numeric code. If you are using a 6000 object code, you will need a three digit numeric code with an alpha digit.
